#### PART I

### INTRODUCTION

In accepting the responsibility of administering the financial affairs of a public school system, each member of the school board must recognize not only his responsibilities toward the educational needs of the student population of the unit but also the board's relationship with and responsibilities toward the taxpayers of the local unit and of the state. Among other items, faithful performance of duty requires adequate budgeting, accurate accounting and informative reporting of all financial transactions and the establishment of sound business practices for effective and efficient operation of all schools in the unit.

A prescribed accounting system for any area of government, including the public schools, must be flexible enough to adapt to units which are large, small or intermediate in size. It must be capable of functioning as a manual system or one which may be maintained with mechanical or with electronic data processing equipment. It must be so organized that it will provide a uniform classification of receipts and disbursements, effective internal controls and audit trails for post-audit purposes. In addition, the system must conform to legal requirements as established by legislation and administered by the controlling agencies.

### SCOPE OF THE SYSTEM - APPROVAL OF FORMS

The accounting system detailed in the manual is intended to cover fund and appropriation accounting by program for any public school corporation in the State of Indiana with adequate provision for separation by Object classification.

All the necessary forms for fund, program and object accounting are prescribed by the State Board of Accounts in accordance with the Indiana Public Accounting Law. These forms can be used in their original design for manual systems. Although the accounting forms and ledgers cannot be used in systems utilizing mechanical posting equipment or electronic data processing equipment, such systems must provide, as a minimum, the information contained in the manual system with no changes in the fund accounting requirements or the classifications of receipts and expenditures.

When the forms and ledgers are modified for use with computer hardware and software, they must be submitted to the State Board of Accounts for approval as replacements for the prescribed forms. The approval process necessitates submitting, to the attention of the State Examiner, each of the forms exactly as they must be modified for use with a computer and a letter from the school corporation requesting approval for use in the system of the school corporation. The forms submitted shall be a facsimile of the prescribed system (headings of reports, etc.). Otherwise a cross-reference to the prescribed form intended to be replaced shall be submitted.

As a result of advances in computer technology, some computer hardware, software, and application systems can now produce exact replicas of the forms prescribed by the State Board of Accounts. Additionally, some of the prescribed forms are currently replicated on continuous, preformatted computer paper.

The State Board of Accounts prescribes the required accounting system forms, but does not specify the source from which the forms must be obtained. Therefore, the State Board of Accounts will not take exception to the use of forms which provide exact replications of the prescribed forms created by the computer printer or utilizing continuous form computer paper. These exact replications must be identical to the prescribed forms in format, titles and locations of data. These exact replications of prescribed forms are not required to be submitted to the State Board of Accounts for approval and each form should be identified as "PRESCRIBED BY THE STATE BOARD OF ACCOUNTS" in the same location as on the prescribed form.

#### **DEFINITIONS**

The following are definitions, for the purposes of the manual, of frequently used terms.

<u>Allotment</u> - The authority by board resolution to spend part of an advertised appropriation from a particular expenditure account.

Appropriation - The authority to spend, by approved budget classification, from a particular program.

<u>Clearing Account</u> - A memorandum account for controlling school corporation assets or liabilities detached from the regular operation accounts of the school corporation.

<u>Contractual Service</u> - A service performed under contract, express or implied, by persons or firms other than school corporation personnel.

<u>Encumbrance</u> - An obligation by way of issuing a purchase order or entering into a contract which is to be met from an appropriation and allotment for which a part of the appropriation and allotment has been reserved. The amount ceases to exist as an encumbrance when it has been liquidated.

Expenditure Account - An account for recording amounts expended for a specific purpose.

<u>Fund</u> - A complete accounting entity established for controlling available cash, which has been collected for either general or specific purposes, through the recording of both receipt and disbursement transactions.

<u>Ledger</u> - A collection, group, book, or file of ledger accounts.

<u>Ledger Account</u> - A page, sheet, card, or other hard copy provision for recording all transactions of a particular or related nature.

Object - Identifies the expenditure by function or purpose.

<u>Program</u> - An account for recording and controlling the expenditure of amounts for a general area of related purposes.

Receipt Account - An account for recording amounts received from the same source.

<u>Salaries</u> - Amounts paid for personal services of employees of the school corporation, whether on an annual, a monthly, a daily or an hourly basis.

<u>School Board</u> - The governing body of a school corporation, including Board of School Commissioners, Board of Education, Board of School Trustees, etc.

#### SINGLE ENTRY ACCOUNTING SYSTEM

The description of the system prescribed in the manual is generally for use as a single entry system on the cash basis of accounting. It is provided with certain Clearing Accounts which are used as memorandum accounts to provide a record of transactions that temporarily change the nature of some assets or liabilities. The proper use of the system will provide the school administration, its governing body, the taxpayers of the corporation and the controlling state and federal agencies with the necessary information regarding financial transactions of a current operating nature. Subsidiary ledgers are necessary to maintain area cost or property and plant records which may be desired or found to be necessary for other purposes. Some of these may be included as component parts of a double entry system.

#### DOUBLE ENTRY ACCOUNTING SYSTEM

Although the manual does not mandate the use of double entry accounting for school corporations, it is evident that steps must be taken toward a double entry system and it is recommended that all school business officials begin preparations toward adoption of a double entry accounting system. The system described herein can be modified to double entry accounting. Some additional accounts that are required are presented in this part along with representative journal entries and "T" accounts showing the results of those journal entries.

The fund concept is followed throughout the manual, therefore the balance sheet accounts presented are for specific funds. Each fund has its own set of self-balancing accounts.

Fixed assets and long term debt are not recognized in individual funds. They are recorded in two separate self-balancing groups of accounts.

Each fund has asset, liability, budgetary, and fund balance accounts in which are recorded on a control basis all of the transactions affecting that fund. Subsidiary appropriation, expenditure, and revenue accounts are maintained in the manner explained in other parts of the manual. The General Ledger Control Accounts are for the most part posted from totals developed from posting detailed appropriation, encumbrance, expenditure, and revenue accounts.

The system as presented herein embraces double entry accounting but is not on an accrual basis. That is, revenue is not recognized until actually received and expenditures are not recognized until the cash disbursements are made. The concept of profit accountability and the necessity to properly match revenue with the expense of generating the revenue typically present in commercial accounting systems is not pertinent to school accounting. Instead, emphasis is placed on the disclosure of dollar accountability and the matching of actual expenditures with planned expenditures as presented in the school budget.

In summary, emphasis shifts from accounting practices concerning the matching of costs and revenues toward techniques designed to account for and control the expenditure of funds in accordance with predetermined plans as shown by the budget adopted by the school board.

# These are control accounts for which detailed subsidiary accounts are provided in the prescribed system.

In order to show the interrelationship of the balance sheet accounts and the method of posting them, some typical journal entries are illustrated.

The first group are those that would be required to initially set up the double entry system.

The second group illustrates various transactions. These entries are presented in summary form for an entire period. Actual entries would be made from totals of postings to subsidiary ledgers on a monthly basis.

The third group illustrates the method of closing the nominal or temporary accounts at the end of the year.

The fourth group illustrates fixed asset requirements.

# Other Credits

### Investment In General Fixed Assets

The general fixed asset account group is a group of accounts in which are recorded acquisition of all fixed assets.

The entries in these accounts are made in addition to the normal posting to the regular fund accounts. For example the purchase of equipment costing \$10,000 would be recorded in the General Fund as follows:

Expenditures 10,000

Cash 10,000

The corresponding entry in the general fixed asset group is:

Equipment 10,000

Investment in General Fixed Assets 10,000

These accounts would be used only if fixed assets are to be recorded in the accounting records.

#### GENERAL LONG TERM DEBT ACCOUNT GROUP

#### **Assets**

Amount Available in Debt Service Fund Amount To Be Provided for Retirement of Long Term Debt

### Liability

Leases Payable General Obligation Bonds Payable

The general long term debt account group is a group of accounts in which are recorded the unmatured portion of the school corporations long term indebtedness.

#### OTHER FUNDS

Other funds of the School Corporation would be kept with generally the same Chart of Accounts as the General Fund or Capital Projects Fund.

#### IMPLEMENTATION OF DOUBLE ENTRY ACCOUNTING SYSTEM

School corporations that desire to implement a double entry accounting system should contact the State Board of Accounts for assistance before proceeding.

	To set up initial supplies inventory (these accounts are optional and		

(4) Fund Balance

1,500

Reserve For Encumbrances - 1993

1,500

Set up prior year encumbrances to be carried forward to current year. This entry would be made only when double entry records are established for the first time. The Reserve for Encumbrance Account will ordinarily be carried forward from the previous year.

The above entries set up the basic General Ledger for the first time.

#### **Transaction Entries**

(5) Estimated Revenue

100,000

Appropriations Fund Balance

95,000 5,000

To establish estimated revenues and appropriations at the beginning of the budget year. If the appropriations had been in excess of Estimated Revenue the balancing entry to Fund Balance would have been a debit.

#### Opening Entries

(6) Encumbrances

4,000

Reserve For Encumbrances - 1993

4,000

This account records the balance of encumbrances as shown by subsidiary appropriation and encumbrance ledgers. It should be adjusted to actual outstanding encumbrances before financial statements are taken from the records, but at least at June 30 and December 31 each year. Most school corporations will find it desirable to make the entry monthly. At the end of the budget year, the Encumbrance Account will be closed and the Reserve for Encumbrances carried forward to the succeeding year.

(7) Expenditures

95,400

Cash

95.000

**Payroll Deductions** 

400

To record cash expenditures and payroll deductions. This entry is made from totals of posting subsidiary appropriation and expenditure ledgers.

(8) Cash

102,000

Revenue

102,000

To record revenue received.

(9) Reserve For Encumbrances - 1992

100

Fund Balance

100

This entry cancels the encumbrances brought forward from the prior year and credits fund balance with the excess of the encumbrance brought forward over the actual expenditures made against the encumbrance.

(10) Cash

2,600

Investments Revenue 2,500 100

To record liquidation of investments and interest received.

(11) Investments 3,000 Cash 3,000 To record purchase of investments. **Closing Entries** (a) Reserve For Encumbrances - 1992 1,400 Appropriations 95,000 Fund Balance 3,000 Expenditures 95,400 Encumbrances 4,000 102,100 (b) Revenue Estimated Revenue 100,000 **Fund Balances** 2,100

Note that expenditures includes both expenditures from current year appropriations and expenditures from prior year encumbrances brought forward.
